CONTENTS OF VOLUME 113

NUMBER 1, 22 FEBRUARY 1987

MENH, N. C., Responses of weakly non-linear dynamical systems subjected to random parametric and external excitations	1
UKLEJEWSKI, R., Analysis of transmission of vibrations in a porous vibroisolator on the basis of electrical transmission line theory	9
BAPAT, C. N. and POPPLEWELL, N., Several similar vibroimpact systems	17
HODGSON, M. R. and ORLOWSKI, R. J., Acoustic scale modelling of factories, Part I: Principles, instrumentation and techniques	29
IBRAHIM, S. R., An upper Hessenberg sparse matrix algorithm for modal identification on minicomputers	47
GONÇALVES, P. B. and BATISTA, R. C., Frequency response of cylindrical shells partially submerged or filled with liquid	59
FANG, T. and DOWELL, E. H., Transient mean square response of randomly damped linear systems	71
LAURA, P. A. A., GUTIERREZ, R. H., CORTINEZ, V. H. and UTJES, J. C., Transverse vibrations of circular plates and membranes with intermediate supports	81
OHTA, M., HATAKEYAMA, K. and UCHINO, E., A new method for parameter identification based on a new measure of statistical independence	87
SINGH, V. P., UPADHYAY, P. C. and KISHOR, B., On the dynamic response of buried orthotropic cylindrical shells	101
YANAGISAWA, T. and KOIKE, N., Cancellation of both phase mismatch and position errors with rotating microphones in sound intensity measurements	117
ISHII, S. and KAKUTANI, T., Acoustic waves in parallel shear flows in a duct	127
BIRLIK, G. A. and MENGİ, Y., Transient wave propagation in a viscoelastic layered composite—an approximate theory	141
SZEMPLIŃSKA-STUPNICKA, W., Secondary resonances and approximate models of routes to chaotic motion in non-linear oscillators	155
HÅKANSSON, B. and CARLSSON, P., Bias errors in mechanical impedance data obtained with impedance heads	173
<i>Letters to the Editor</i>	
GOTTLIEB, H. P. W., Extension of a text-book problem to curve veering for coupled pendulums	185
PERKINS, N. C. and MOTE, C. D., Jr., Authors' reply	188
ERCOLI, L. and LAURA, P. A. A., Fundamental frequencies of orthotropic plates elastically restrained against rotation along the edges and subjected to in-plane forces	190
SHASTRY, B. P. and VENKATESWARA RAO, G., Dynamic stability of a cantilever column with an intermediate concentrated periodic load	194

PRAMILA, A., Natural frequencies of a submerged axially moving band	198
KRISTIANSEN, U. R., Sound radiation from axisymmetric sources of complex shape	204
SAKIYAMA, T. and MATSUDA, H., Free vibration of rectangular Mindlin plate with mixed boundary conditions	208
SLAMA, J. C. G., Angular expression for the Rayleigh quotient	215

NUMBER 2, 8 MARCH 1987

BAUER, H. F., Coupled frequencies of a hydroelastic system, consisting of an elastic shell and frictionless liquid	217
HOWE, M. S., Surface pressure fluctuations produced by vortex shedding from a coated airfoil	233
NOISEUX, D. U., HARDY, C. and HOULE, S., Statistical methods applied to Aeolian vibrations of overhead conductors	245
HODGSON, M. R. and ORLOWSKI, R. J., Acoustic scale modelling of factories, Part II: 1:50 Scale model investigations of factory sound fields	257
GAYLARD, M. E., Measurements associated with smoothed frequency response, Part I: Orthogonal polynomial characterizations of dynamic structures	273
GAYLARD, M. E., Measurements associated with smoothed frequency response, Part II: Identification of stiffnesses and masses in a dynamic structure	291
NAGAYA, K., TAKEDA, S., TSUKUI, Y. and KUMAI DO, T., Active control method for passing through critical speeds of rotating shafts by changing stiffnesses of the supports with use of memory metals	307
MUSTAFA, B. A. J. and ALI, R., Prediction of natural frequency of vibration of stiffened cylindrical shells and orthogonally stiffened curved panels	317
ROBERTS, J. B. and KAYA, F., Vibration control of a flexible transmission shaft by means of a squeeze-film damper: an experimental investigation	329
REINIS, S., WEISS, D. S., FEATHERSTONE, J. W. and TSAROS, C., Audiometric effects of simulated sonic booms in guinea pigs	347
REINIS, S., WEISS, D. S., FEATHERSTONE, J. W. and TSAROS, C., Long-term effects of simulated sonic booms on hearing in Rhesus monkeys	355
LANGLEY, R. S., On quasi-stationary approximations to non-stationary random vibration	365
HOWARD, I. M., NORTON, M. P. and STONE, B. J., A coincidence damper for reducing pipe wall vibrations in piping systems with disturbed internal turbulent flow	377
PAPASTAVRIDIS, J. G., Rayleigh's Principle via least action	395

Letters to the Editor

PANTER, C. H., Hearing level measurements on students aged 18 to 25 years exposed to disco and pop music	401
THIERY, L., Characterization of industrial impulse noises by discriminant analysis	404

PARK, Y. P., Dynamic stability of a free Timoshenko beam under a controlled follower force	407
OZIMEK, E., Transformation of the space of room acoustic states into the space of sound deformation	417
DOONG, J.-L., Vibration and stability of an initially stressed thick plate according to a high-order deformation theory	425
SALIKUDDIN, M. and RAMAKRISHNAN, R., Acoustic power measurement for single and annular stream duct-nozzle systems utilizing a modal decomposition scheme	441
SALIKUDDIN, M., Sound radiation from single and annular stream nozzles with modal decomposition of in-duct acoustic power	473
KOUDA, A. and MORI, S., Entrained oscillations in a system of mutually coupled van der Pol oscillators with time delay in the coupling states	503
CHOY, F. K. and PADOVAN, J., Non-linear transient analysis of rotor-casing rub events	529
MUKHOPADHYAY, M., Vibration analysis of elastically restrained rectangular plates with concentrated mass	547
HEPPLER, G. R. and HANSEN, J. S., The response of a circular cylinder to a nuclear explosion	559

Letters to the Editor

OHTA, M., KUWAHARA, S. and XIAO, Y., A probabilistic evaluation method for an arbitrarily fluctuating signal-to-noise ratio for two different sound waves in a noise environment	585
HUMBAD, N. G. and MALICK, S. P., Modal proximity factor	591
ANNOUNCEMENTS	595
BOOK REVIEWS	603
HUMAN RESPONSE TO VIBRATION	607
INDEX TO VOLUME 113	611
